**Parkland School District
Continuous Energy Improvement (CEI) Scope
Ironton Elementary School
Phase III – June 1, 2017 through May 31, 2018**

The Parkland School District (PSD) in Allentown, Pennsylvania has been provided an opportunity to work in conjunction with PPL Electric Utilities to participate in a Continuous Energy Improvement (CEI) Program. Designed to possibly save PSD as much as 5% to 15% of the district's annual electrical energy usage, Ironton (IR) will be utilizing procedures and methodologies to support the new "Parkland Culture" of energy conservation. We will continue to strive for a program goal at 2% for the third year of our program.

To achieve our goal, we will be relying on the PSD Energy Team, our own IR Green Team, and past experiences and recommendations for improving our energy efficiency. Our focus will not only be to decrease our energy usage here at school, but to also educate students and their families of energy saving habits and practices they may try at home to conserve energy. We will track and analyze available data for electrical consumption to ascertain the effect of our changed behaviors on electrical usage.

Communication is an important component of our ongoing success. We will willingly hold and attend Green Team meetings and engage in presentations and discussions with our staff. We value keeping staff, students, and cohorts updated and informed of Ironton's decisions, progress, and successes with our CEI effort.
